

Chris Emmanuel Catipay

GoHighLevel (GHL) Specialist | Web Designer

Web designer and automations specialist - I design and build client websites, then build the systems behind them in GoHighLevel: migrations, pipelines and multi-channel follow-up, plus the training that lets a team run it without me.

GoHighLevel CRM migration Automations Multi-channel Web design Landing pages Brand & graphics Paid media

Experience

Unreal Productions · Senior Graphics & Web Designer | Automation Expert

Remote · 2023 – 2026

- Led graphics and web design across the brand - landing pages, campaign artwork, social and promotional assets - working to a **consistent visual system** rather than one-off files.
- Created **multiple landing pages for productions** - shows, launches and campaigns - each with its own look but built on the same underlying structure, so a new page could go live without starting from zero.
- Built **reusable page sections and design patterns** so new campaigns could be assembled instead of designed from scratch, cutting turnaround on launches.
- Handled responsive behaviour, image optimisation and cross-device QA, so pages held up on mobile where most of the traffic landed.

Home Hero Maintenance · Web Developer

Remote · 2021 – 2024

- Built and maintained the company's **lead-generation site**: service pages, location pages and quote-request forms aimed at local search.
- Implemented on-page SEO - structured headings, metadata, page speed and mobile layout - to improve visibility for service-area searches.
- Wired form submissions into the **CRM and notification workflow**, so enquiries were routed to the right person and answered the same day.

Life Mediation · GHL Expert - Migration, Systems Implementation & Team Training

Remote · April 2026 – May 2026

- Migrated a family mediation and support business **off Kartra entirely**, rebuilding their backend in GoHighLevel rather than copying it across - a system built for how they actually work, not a patched-together port.
- Delivered a **full client journey that ran on its own**: leads captured, booked, onboarded and followed up automatically, with reminders and internal notifications handled without manual tracking.
- Trained the internal team through **Loom walkthroughs and SOPs** until they could run pipelines and automations independently, so the system did not depend on me to keep working - then stayed on for post-implementation support as they used it in practice.

Zignify · GoHighLevel Expert - Multi-Channel Automation & Integration

Remote · February 2026 – May 2026

- Gave the client full visibility and control over their CRM by organising leads, opportunities and pipelines in GoHighLevel, then connecting **email, SMS, WhatsApp and voice** into one automated system instead of scattered manual outreach.
- Integrated **Ringover (VoIP)** so calls and messaging ran directly through GoHighLevel, and built automated sales funnels and nurture sequences that moved leads through the pipeline without manual follow-up.
- Set up **dashboards** so the team could track leads and pipeline performance at a glance, and trained them to run the system confidently on their own.

Rain Maker · Sales Operations Manager

Remote · November 2025 – July 2026

- Fixed a lead follow-up bottleneck by rebuilding a client's automation - proper lead routing and timely reminders - which **increased their bookings by 30%**.
- Built the CRM, pipelines and appointment-setter systems from the ground up for a **7-figure-a-month coaching business**, giving their 12-person setter team a structure that could keep up with their lead volume.
- Consolidated scattered communication - email, SMS, WhatsApp and voice - into one automated system with **VoIP integration**, so the team could manage lead campaigns across multiple accounts without switching between tools.

Course Creator · CRM Expert

Remote · November 2023 – December 2023

- Managed the full **GoHighLevel CRM** for a course creator: sales funnel, lead tagging, pipeline routing and the automations connecting each stage, so students and leads moved through the system automatically instead of being tracked and followed up by hand.

Aesthetic Influence · GoHighLevel / Media Buyer for Aesthetic Clinic

Remote · April 2023 – August 2025

- Managed GoHighLevel **across multiple agency accounts**, building the full funnel and automation workflow from lead capture through booking and follow-up sequences, so no lead was left unmanaged across their client base.
- The systems performed well enough that I was later trusted with their ad campaigns, handling **\$10K–\$20K/day in ad spend** across accounts.

Services

GoHighLevel systems & web design

CRM migrations · Funnels & automations · Landing pages
